Characteristics:	Key Benefits:
	<ul> <li>Made to order protein - from design to production - by highly experienced protein experts.</li> <li>Protein expressed in mammalian cells and purified in one-step affinity chromatography</li> <li>The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protei
	cannot be expressed or purified.

Grade:	custom-made
Target Details	
Target:	SLC22A13
Alternative Name:	Slc22a13 (SLC22A13 Products)
Background:	Solute carrier family 22 member 13 (Organic anion transporter 10) (OAT10) (Organic cation transporter-like 3) (ORCTL-3), FUNCTION: Anion antiporter that mediates the transport of orotate and nicotinate in exchange for organic or inorganic anions (PubMed:35144162).  Translocates orotate across the apical membrane of proximal tubule epithelial cells. Possibly involved in orotate renal reabsorption and nicotinate intestinal reabsorption (PubMed:35144162). Orotate transport is CI(-)-dependent (By similarity).  {ECO:0000250 UniProtKB:Q9Y226, ECO:0000269 PubMed:35144162}.
Molecular Weight:	60.7 kDa
