Quantity:	1 mg
Target:	CPSF6
Protein Characteristics:	AA 1-551
Origin:	Mouse
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This CPSF6 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Purpose:	Custom-made recombinat Cpsf6 Protein expressed in mammalien cells.
Sequence:	MADGVDHIDI YADVGEEFNQ EAEYGGHDQI DLYDDVISPS ANNGDAPEDR DYMDTLPPTV
	GDDVGKGAAP NVVYTYTGKR IALYIGNLTW WTTDEDLTEA VHSLGVNDIL EIKFFENRAN

Product Details

	another tag necessary. In case you have a special request, please contact us.
Characteristics:	Key Benefits:
	 Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalien cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris Page, Western Blot
Grade:	custom-made

Target Details

Target:	CPSF6
Alternative Name:	Cpsf6 (CPSF6 Products)
Background:	Cleavage and polyadenylation specificity factor subunit 6,FUNCTION: Component of the
	cleavage factor Im (CFIm) complex that functions as an activator of the pre-mRNA 3'-end
	cleavage and polyadenylation processing required for the maturation of pre-mRNA into
	functional mRNAs. CFIm contributes to the recruitment of multiprotein complexes on specific
	sequences on the pre-mRNA 3'-end, so called cleavage and polyadenylation signals (pA
	signals). Most pre-mRNAs contain multiple pA signals, resulting in alternative cleavage and
	polyadenylation (APA) producing mRNAs with variable 3'-end formation. The CFIm complex
	acts as a key regulator of cleavage and polyadenylation site choice during APA through its
	binding to 5'-UGUA-3' elements localized in the 3'-untranslated region (UTR) for a huge number
	of pre-mRNAs. CPSF6 enhances NUDT21/CPSF5 binding to 5'-UGUA-3' elements localized
	upstream of pA signals and promotes RNA looping, and hence activates directly the mRNA 3'-
	processing machinery. Plays a role in mRNA export. {ECO:0000250 UniProtKB:Q16630}.

Target Details	
Molecular Weight:	59.2 kDa
UniProt:	Q6NVF9
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
