- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target Details

Target:	Nanos Homolog 1 (NANOS1)
---------	--------------------------

Alternative Name:	Nanos1 (NANOS1 Products)
-------------------	--

Background:	Nanos homolog 1 (NOS-1),FUNCTION: May act as a translational repressor which regulates translation of specific mRNAs by forming a complex with PUM2 that associates with the 3'-UTR of mRNA targets. Capable of interfering with the proadhesive and anti-invasive functions of E-cadherin. Up-regulates the production of MMP14 to promote tumor cell invasion (By similarity). Not essential for normal development. {ECO:0000250, ECO:0000269 PubMed:12834871}.
