	 Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalien cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target:	SLC25A40
Alternative Name:	SIc25a40 (SLC25A40 Products)
Background:	Probable mitochondrial glutathione transporter SLC25A40 (Solute carrier family 25 member 40),FUNCTION: Probable mitochondrial transporter required for glutathione import into mitochondria. Glutathione, which plays key roles in oxidative metabolism, is produced exclusively in the cytosol and is imported in many organelles (By similarity). Mitochondrial glutathione is required for the activity and stability of proteins containing iron-sulfur clusters, as well as erythropoiesis (PubMed:34707288). {ECO:0000250 UniProtKB:Q8TBP6, ECO:0000269 PubMed:34707288}.
