	DTLKDSFSQL INLLEEKDHE AVRM Sequence without tag. The proposed Purification-Tag is		
	based on experiences with the expression system, a different complexity of the protein		
	could make another tag necessary. In case you have a special request, please contact us.		
Characteristics:	Key Benefits:		
	Made to order protein - from design to production - by highly experienced protein experts.		
	Protein expressed in mammalien cells and purified in one-step affinity chromatography		
	The optimized expression system ensures reliability for intracellular, secreted and		
	transmembrane proteins.		

	State-of-the-art algorithm used for plasmid design (Gene synthesis).	
	This protein is a made-to-order protein and will be made for the first time for your order. Our	
	experts in the lab try to ensure that you receive soluble protein.	
	If you are not interested in a full length protein, please contact us for individual protein fragments.	
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
