Product Details

- Made to order protein - from design to production - by highly experienced protein experts.
- Protein expressed in mammalian cells and purified in one-step affinity chromatography
- The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity:	> 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC)
Grade:	custom-made

Target Details

Target:	SLC25A29
Alternative Name:	Slc25a29 (SLC25A29 Products)
Background:	Mitochondrial basic amino acids transporter (Carnitine/acylcarnitine translocase-like) (CACT-like) (Mitochondrial carnitine/acylcarnitine carrier protein CACL) (Mitochondrial ornithine transporter 3) (Solute carrier family 25 member 29),FUNCTION: Mitochondrial transporter of arginine, lysine, homoarginine, methylarginine (By similarity). Transports with a much lesser extent, ornithine and histidine (PubMed:19287344). Does not transport carnitine nor acylcarnitines. Functions by both counter-exchange and uniport mechanisms. Plays a physiological role in the import of basic amino acids into mitochondria for mitochondrial protein synthesis and amino acid degradation (By similarity). {ECO:0000250 UniProtKB:Q8N8R3, ECO:0000269 PubMed:19287344}.
Molecular Weight:	32.7 kDa
UniProt:	Q8BL03
