Characteristics:	Key Benefits:
	 Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalian cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC)
Grade:	custom-made
Target Details	
Target:	COBRA1
Alternative Name:	Nelfb (COBRA1 Products)
Background:	Negative elongation factor B (NELF-B) (Cofactor of BRCA1),FUNCTION: Essential component o
	the NELF complex, a complex that negatively regulates the elongation of transcription by RNA
	polymerase II (Pol II) (PubMed:25773599). The NELF complex, which acts via an association
	with the DSIF complex and causes transcriptional pausing, is counteracted by the P-TEFb
	kinase complex (By similarity). May be able to induce chromatin unfolding (By similarity).
	Essential for early embryogenesis, plays an important role in maintaining the undifferentiated
	state of embryonic stem cells (ESCs) by preventing unscheduled expression of developmental

developmental cues, facilitates plasticity and cell fate commitment in ESCs by establishing the

appropriate expression level of signaling molecules (PubMed:25773599). Supports the
