Mucolipin 2 (MCOLN2) (AA 1-566) protein (His tag)

Overview

Quantity:	1 mg
Target:	Mucolipin 2 (MCOLN2)
Protein Characteristics:	AA 1-566
Origin:	Mouse
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	SDS-PAGE (SDS), Western Blotting (WB)

Product Details

Purpose:	Custom-made recombinat Mcoln2 Protein expressed in mammalien cells.

	based on experiences with the expression system, a different complexity of the protein

could make another tag necessary. In case you have a special request, please contact us. Characteristics: Key Benefits: Made to order protein - from design to production - by highly experienced protein experts.

- Protein expressed in mammalien cells and purified in one-step affinity chromatography
 The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity:	> 90 % as determined by Bis-Tris Page, Western Blot
Grade:	custom-made

Target Details

Target:

Alternative Name:	Mcoln2 (MCOLN2 Products)
Background:	Mucolipin-2 (Transient receptor potential channel mucolipin 2) (TRPML2),FUNCTION:
	Nonselective cation channel probably playing a role in the regulation of membrane trafficking
	events. Acts as a Ca(2+)-permeable cation channel with inwardly rectifying activity
	(PubMed:19763610). May activate ARF6 and be involved in the trafficking of GPI-anchored
	cargo proteins to the cell surface via the ARF6-regulated recycling pathway (By similarity). May
	play a role in immune processes. In adaptive immunity, TRPML2 and TRPML1 may play
	redundant roles in the function of the specialized lysosomes of B cells (PubMed:17050035). In
	the innate immune response, may play a role in the regulation of chemokine secretion and
	macrophage migration (PubMed:26432893). Through a possible and probably tissue-specific
	heteromerization with MCOLN1 may be at least in part involved in many lysosome-dependent
	cellular events. {ECO:0000250 UniProtKB:Q8IZK6, ECO:0000269 PubMed:17050035,

Molecular Weight:	65.5 kDa
UniProt:	Q8K595
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
