Product Details

- Made to order protein - from design to production - by highly experienced protein experts.
- Protein expressed in mammalian cells and purified in one-step affinity chromatography
- The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Alternative Name:	Elac1 (ELAC1 Products)

Background:	Zinc phosphodiesterase ELAC protein 1 (EC 3.1.26.11) (Elac homolog protein 1) (Ribonuclease Z 1) (RNase Z 1) (tRNA 3' endonuclease 1) (tRNase Z 1), FUNCTION: Zinc phosphodiesterase, which displays some tRNA 3'-processing endonuclease activity. Specifically involved in tRNA repair: acts downstream of the ribosome-associated quality control (RQC) pathway by removing a 2',3'-cyclic phosphate from tRNAs following cleavage by ANKZF1. tRNAs are then processed by TRNT1. {ECO:0000250 UniProtKB:Q9H777}.
