transmembrane proteins.

- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target: EDARADD

Alternative Name: Edaradd ([EDARADD Products](#))

Background: Ectodysplasin-A receptor-associated adapter protein (EDAR-associated death domain protein) (Protein crinkled),FUNCTION: Adapter protein that interacts with EDAR DEATH domain and couples the receptor to EDA signaling pathway during morphogenesis of ectodermal organs. Mediates the activation of NF-kappa-B (By similarity). {ECO:0000250, ECO:0000269|PubMed:11882293}.

Molecular Weight: 23.8 kDa
