transmembrane proteins.

• State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity:

> 90 % as determined by Bis-Tris Page, Western Blot

custom-made

Target Details

Application Notes:

Target:	NME5	
Alternative Name:	Nme5 (NME5 Products)	
Background:	Nucleoside diphosphate kinase homolog 5 (NDK-H 5) (NDP kinase homolog 5) (3'-5' exonuclease NME5) (EC 3.1) (Rsph23) (nm23-M5),FUNCTION: Functions as part of axonemal radial spoke complexes that play an important part in the motility of sperm and cilia (PubMed:36417862). Does not seem to have nucleoside diphosphate kinase (NDPK) activity. Confers protection from cell death by BAX and alters the cellular levels of several antioxidant enzymes including GPX5. May play a role in spermiogenesis by increasing the ability of late-	
	stage spermatids to eliminate reactive oxygen species (PubMed:12788088). {ECO:0000269 PubMed:12788088, ECO:0000269 PubMed:36417862}.	
Molecular Weight:	24.0 kDa	
UniProt:	Q99MH5	
Pathways:	Nucleotide Phosphorylation, Ribonucleoside Biosynthetic Process, Negative Regulation of intrinsic apoptotic Signaling	
Application Details		

In addition to the applications listed above we expect the protein to work for functional studies
