

Datasheet for ABIN7560553 SPRR2A Protein (AA 1-83) (Fc Tag)

Overview Quantity: 1 mg SPRR2A Target: Protein Characteristics: AA 1-83 Origin: Mouse Source: HEK-293 Cells Protein Type: Recombinant Purification tag / Conjugate: This SPRR2A protein is labelled with Fc Tag. **Product Details** Custom-made recombinant Sprr2a1 Protein expressed in mammalian cells. Purpose: MSYYQQQCNQ PCRPPPVCPP PKCPEPCPPQ VWPGPCRPVM CFEPCLPSVW PGPCRPVVCY Sequence: EQCPPQPWQS TCPPVQFPPC QQK Sequence without tag. The proposed Purification-Tag is based on experiences with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us. Specificity: If you are looking for a specific domain and are interested in a partial protein or a different isoform, please contact us regarding an individual offer. Characteristics: Key Benefits: • Made to order protein - from design to production - by highly experienced protein experts. · Protein expressed in mammalian cells and purified in one-step affinity chromatography · The optimized expression system ensures reliability for intracellular, secreted and

• State-of-the-art algorithm used for plasmid design (Gene synthesis).

transmembrane proteins.

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

| Purity: | > 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC) |
|---------|---|
| Grade: | custom-made |

Target Details

| Target: | SPRR2A |
|---------------------|--|
| Alternative Name: | Sprr2a1 (SPRR2A Products) |
| Background: | Small proline-rich protein 2A1 (small proline-rich protein 2A),FUNCTION: Gut bactericidal protein |
| | that selectively kills Gram-positive bacteria by binding to negatively charged lipids on bacterial |
| | membranes, leading to bacterial membrane permeabilization and disruption |
| | (PubMed:34735226). Specifically binds lipids bearing negatively charged headgroups, such as |
| | phosphatidic acid, phosphatidylserine (PS), cardiolipin (CL), and phosphatidylinositol |
| | phosphates, but not to zwitterionic or neutral lipids (By similarity). Induced by type-2 cytokines |
| | in response to helminth infection and is required to protect against helminth-induced bacterial |
| | invasion of intestinal tissue (PubMed:34735226). May also be involved in the development of |
| | the cornified envelope of squamous epithelia, however, additional evidences are required to |
| | confirm this result in vivo (By similarity). {ECO:0000250 UniProtKB:P35326, |
| | EC0:0000269 PubMed:34735226}. |
| Molecular Weight: | 9.4 kDa |
| UniProt: | Q9CQK8 |
| Application Details | |
| Application Notes: | We expect the protein to work for functional studies. As the protein has not been tested for |
| | functional studies yet we cannot offer a guarantee though. |

Handling

| Format: | Liquid |
|------------------|--|
| Buffer: | The buffer composition is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. |
| Expiry Date: | 12 months |
