

Datasheet for ABIN7560569
PEN2 Protein (AA 1-101) (His tag)

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	PEN2 (PSENEN)
Protein Characteristics:	AA 1-101
Origin:	Mouse
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PEN2 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Purpose:	Custom-made recombinat Psenen Protein expressed in mammalien cells.
Sequence:	<p>MNLERSVNEE KLNLCRKYYL GGFAFLPFLW LVNIFWFFRE AFLAPAYTEQ SSIKGYVWRS</p> <p>AVGFLFWVII LATWITIFI YRPRWGALGD YLSFTIPLGT P Sequence without tag. The proposed Purification-Tag is based on experiences with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.</p>
Characteristics:	<p>Key Benefits:</p> <ul style="list-style-type: none"> • Made to order protein - from design to production - by highly experienced protein experts. • Protein expressed in mammalien cells and purified in one-step affinity chromatography • The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. • State-of-the-art algorithm used for plasmid design (Gene synthesis).

Product Details

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity:	> 90 % as determined by Bis-Tris Page, Western Blot
---------	---

Grade:	custom-made
--------	-------------

Target Details

Target:	PEN2 (PSENEN)
---------	---------------

Alternative Name:	Psenen (PSENEN Products)
-------------------	--

Background:	Gamma-secretase subunit PEN-2 (Presenilin enhancer protein 2),FUNCTION: Essential subunit of the gamma-secretase complex, an endoprotease complex that catalyzes the intramembrane cleavage of integral membrane proteins such as Notch receptors and APP (amyloid-beta precursor protein) (PubMed:12522139, PubMed:24941111). The gamma-secretase complex plays a role in Notch and Wnt signaling cascades and regulation of downstream processes via its role in processing key regulatory proteins, and by regulating cytosolic CTNNB1 levels (Probable). PSENEN modulates both endoproteolysis of presenilin and gamma-secretase activity (PubMed:12522139, PubMed:24941111). {ECO:0000269 PubMed:12522139, ECO:0000269 PubMed:24941111, ECO:0000305}.

Molecular Weight:	12.0 kDa
-------------------	----------

UniProt:	Q9CQR7
----------	------------------------

Pathways:	Notch Signaling , Neurotrophin Signaling Pathway
-----------	--

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.

Application Details

Restrictions: For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
