This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Background:	Gap junction epsilon-1 protein (Connexin-23) (Cx23),FUNCTION: Mediates calcium-independent ATP release, suggesting activity as a hemichannel (PubMed:18849090). Does not form functional gap junctions (PubMed:18849090). May play a non-essential role in eye lens development (PubMed:18385072, PubMed:27038752). {ECO:0000269 PubMed:18385072, ECO:0000269 PubMed:27038752}.
