| HINNLYNTVF WALIQQSGLT PVQAQQRLKG TLTADKNEIL FSEFHINYNN EPHMYRKGTV |
| LVWQKVEEVR TQEVRLPAEM EGEKKAVART RTRVVALNCD LIGDAFWKEH PEILAEEN Sequence |
| without tag. The proposed Purification-Tag is based on experiences with the expression |
| system, a different complexity of the protein could make another tag necessary. In case you |
| have a special request, please contact us. |
| If you are looking for a specific domain and are interested in a partial protein or a different |
| isoform, please contact us regarding an individual offer. |
| Key Benefits: |
| |

| | Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalian cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. State-of-the-art algorithm used for plasmid design (Gene synthesis). |
|---------|--|
| | This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein. |
| | If you are not interested in a full length protein, please contact us for individual protein fragments. |
| | The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified. |
| Purity: | > 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC) |
| Grade: | custom-made |

Target Details

| 5 | |
|---------------------|--|
| Target: | THG1L |
| Alternative Name: | Thg1I (THG1L Products) |
| Background: | Probable tRNA(His) guanylyltransferase (EC 2.7.7.79) (tRNA-histidine guanylyltransferase),FUNCTION: Adds a GMP to the 5'-end of tRNA(His) after transcription and RNase P cleavage. This step is essential for proper recognition of the tRNA and for the fidelity of protein synthesis. Also functions as a guanyl-nucleotide exchange factor/GEF for the MFN1 and MFN2 mitofusins thereby regulating mitochondrial fusion. By regulating both mitochondria dynamics and bioenergetic function, it contributes to cell survival following oxidative stress. {ECO:0000250 UniProtKB:Q9NWX6}. |
| Molecular Weight: | 35.0 kDa |
| UniProt: | Q9CY52 |
| Application Details | |
| Application Notes: | We expect the protein to work for functional studies. As the protein has not been tested for functional studies yet we cannot offer a guarantee though. |

Handling

| Format: | Liquid |
|------------------|--|
| Buffer: | The buffer composition is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. |
| Expiry Date: | 12 months |
