This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Alternative Name:	Spc24 (SPC24 Products)

Background:	Kinetochole protein Spc24,FUNCTION: Acts as a component of the essential kinetochole-associated NDC80 complex, which is required for chromosome segregation and spindle checkpoint activity. Required for kinetochole integrity and the organization of stable microtubule binding sites in the outer plate of the kinetochole. The NDC80 complex synergistically enhances the affinity of the SKA1 complex for microtubules and may allow the NDC80 complex to track depolymerizing microtubules. {ECO:0000250 UniProtKB:Q8NBT2}.
