Product Details

- Made to order protein - from design to production - by highly experienced protein experts.
- Protein expressed in mammalian cells and purified in one-step affinity chromatography
- The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity:	> 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC)
Grade:	custom-made

Target Details

Target:	SYCE1
Alternative Name:	Syce1 (SYCE1 Products)
Background:	Synaptonemal complex central element protein 1,FUNCTION: Major component of the transverse central element of synaptonemal complexes (SCS), formed between homologous chromosomes during meiotic prophase (PubMed:15944401). Requires SYCP1 in order to be incorporated into the central element (PubMed:15944401, PubMed:16968740). May have a role in the synaptonemal complex assembly, stabilization and recombination (PubMed:15944401). {ECO:0000269 PubMed:15944401, ECO:0000269 PubMed:16968740}.
Molecular Weight:	38.2 kDa
UniProt:	Q9D495
Pathways:	M Phase
