

Datasheet for ABIN7561029

GINS2 Protein (AA 1-185) (His tag)

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	GINS2
Protein Characteristics:	AA 1-185
Origin:	Mouse
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This GINS2 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Purpose:	Custom-made recombinat Gins2 Protein expressed in mammalien cells.
Sequence:	MDAAEVEFLA EKELVTIIPN FSLDKIYLIG GDLGPFNPGL PVDVPLWLAI NLKQRQKCRL LPPEWMDVEK LEQMRDEERK EETFTPVPSP HYPEITKLLL NHASDNIPKA DTIRTLIKDL WDTRMAKLRV SADSFVRQQE AHAKLDNLTL MEISSSGAFL TQALNHMYKL RTNLQPSEST QSQDF Sequence without tag. The proposed Purification-Tag is based on experiences with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.
Characteristics:	Key Benefits: • Made to order protein - from design to production - by highly experienced protein experts. • Protein expressed in mammalien cells and purified in one-step affinity chromatography • The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.

Product Details

- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity:	> 90 % as determined by Bis-Tris Page, Western Blot
Grade:	custom-made

Target Details

Target:	GINS2
Alternative Name:	Gins2 (GINS2 Products)
Background:	DNA replication complex GINS protein PSF2 (GINS complex subunit 2),FUNCTION: Required for correct functioning of the GINS complex, a complex that plays an essential role in the initiation of DNA replication, and progression of DNA replication forks. GINS complex is a core component of CDC45-MCM-GINS (CMG) helicase, the molecular machine that unwinds template DNA during replication, and around which the replisome is built. {ECO:0000250 UniProtKB:Q9Y248}.
Molecular Weight:	21.2 kDa
UniProt:	Q9D600
Pathways:	DNA Replication, Synthesis of DNA

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
