Characteristics:

Key Benefits:

- Made to order protein from design to production by highly experienced protein experts.
- · Protein expressed in mammalian cells and purified in one-step affinity chromatography
- The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target Details

Alternative Name:	Esrra (ESRRA Products)
Background:	Steroid hormone receptor ERR1 (Estrogen receptor-like 1) (Estrogen-related receptor alpha)
	(ERR-alpha) (Nuclear receptor subfamily 3 group B member 1),FUNCTION: Binds to an ERR-
	alpha response element (ERRE) containing a single consensus half-site, 5'-TNAAGGTCA-3'. Can
	bind to the medium-chain acyl coenzyme A dehydrogenase (MCAD) response element NRRE-1
	and may act as an important regulator of MCAD promoter. Binds to the C1 region of the
	lactoferrin gene promoter. Requires dimerization and the coactivator, PGC-1A, for full activity.
	The ERRalpha/PGC1alpha complex is a regulator of energy metabolism. Induces the
	expression of PERM1 in the skeletal muscle (By similarity). {ECO:0000250}.
Molecular Weight:	45.5 kDa
UniProt:	008580
