Product Details

- Protein expressed in mammalian cells and purified in one-step affinity chromatography
- The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity:	> 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC)
Grade:	custom-made

Target Details

Target:	Claudin 4 (CLDN4)
Alternative Name:	Cldn4 (CLDN4 Products)
Background:	Claudin-4 (Clostridium perfringens enterotoxin receptor) (CPE-R) (CPE-receptor),FUNCTION: Channel-forming tight junction protein that mediates paracellular chloride transport in the kidney (PubMed:20921420). Plays a critical role in the paracellular reabsorption of filtered chloride in the kidney collecting ducts (PubMed:20921420). Claudins play a major role in tight junction-specific obliteration of the intercellular space, through calcium-independent cell-adhesion activity. {ECO:0000269 PubMed:20921420}.
Molecular Weight:	22.3 kDa
UniProt:	O35054
Pathways:	Hepatitis C

Application Details

Application Notes:	We expect the protein to work for functional studies. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
