- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity:	> 90 % as determined by Bis-Tris Page, Western Blot
Grade:	custom-made

Target Details

Target:	BIK
Alternative Name:	Bik (BIK Products)
Background:	Bcl-2-interacting killer (Apoptosis inducer NBK) (Bik-like killer protein),FUNCTION: Accelerates programmed cell death. Binding to the apoptosis repressors Bcl-X(L), BHRF1 or Bcl-2 suppresses this death-promoting activity. {ECO:0000269 PubMed:9525867}.
Molecular Weight:	16.9 kDa
UniProt:	O70337
Pathways:	Positive Regulation of Endopeptidase Activity

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Restrictions:	For Research Use only
