Product Details

- Protein expressed in mammalian cells and purified in one-step affinity chromatography
- The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target Details

Target:	HHEX
Alternative Name:	Hhex (HHEX Products)
Background:	<p>Hematopoietically-expressed homeobox protein Hhex (Homeobox protein HEX) (mHex) (Homeobox protein PRH) (Proline-rich homeodomain protein),FUNCTION: Recognizes the DNA sequence 5'-ATTAA-3' (PubMed:10804173). Transcriptional repressor (PubMed:10804173). Activator of WNT-mediated transcription in conjunction with CTNNB1 (PubMed:16936074). Establishes anterior identity at two levels, acts early to enhance canonical WNT-signaling by repressing expression of TLE4, and acts later to inhibit NODAL-signaling by directly targeting NODAL (PubMed:16936074). Inhibits EIF4E-mediated mRNA nuclear export (By similarity). May play a role in hematopoietic differentiation (PubMed:8096636).</p> <p>{ECO:0000250 UniProtKB:Q03014, ECO:0000269 PubMed:10804173, ECO:0000269 PubMed:16936074, ECO:0000269 PubMed:8096636}.</p>
