

Datasheet for ABIN7563804

SLC4A10 Protein (AA 1-1118) (His tag)

Go to Product page

Overview

Quantity:	1 mg
Target:	SLC4A10
Protein Characteristics:	AA 1-1118
Origin:	Mouse
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SLC4A10 protein is labelled with His tag.

Product Details

Purpose:	Custom-made recombinant Slc4a10 Protein expressed in mammalian cells.
Sequence:	MEIKDQGAQM EPLLPTRNDE EAVVDRGGTR SILKTHFEKE DLEGHRTLFI GVHVPLGGRK

	ELSWLDDLMP ESKKKKLEDA EKEEEQSMLA MEDEGTVQLP LEGHYRDDPS VINISDEMSK
	TAMWGNLLVT ADNSKEKESR FPSKSSPS Sequence without tag. The proposed Purification-
	Tag is based on experiences with the expression system, a different complexity of the
	protein could make another tag necessary. In case you have a special request, please
	contact us.
Specificity:	If you are looking for a specific domain and are interested in a partial protein or a different
	isoform, please contact us regarding an individual offer.
Characteristics	
Characteristics:	Key Benefits:
	 Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalian cells and purified in one-step affinity chromatography
	The optimized expression system ensures reliability for intracellular, secreted and
	transmembrane proteins.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein
	fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC)
Grade:	custom-made
Torget Details	
Target Details	
	01.04410
Target:	SLC4A10
Target: Alternative Name:	Slc4a10 (SLC4A10 Products)

Sodium/bicarbonate cotransporter which plays an important role in regulating intracellular pH (PubMed:20566632). Has been shown to act as a sodium/bicarbonate cotransporter in exchange for intracellular chloride (PubMed:20566632). Has also been shown to act as a sodium/biocarbonate cotransporter which is not responsible for net efflux of chloride, with the observed chloride efflux being due to chloride self-exchange (By similarity). Controls neuronal pH and may contribute to the secretion of cerebrospinal fluid (PubMed:18165320). Reduces the excitability of CA1 pyramidal neurons and modulates short-term synaptic plasticity (PubMed:26136660). Required in retinal cells to maintain normal pH which is necessary for normal vision (PubMed:23056253). In the kidney, likely to mediate bicarbonate reclamation in the apical membrane of the proximal tubules (By similarity). {ECO:0000250|UniProtKB:Q6U841, ECO:0000250|UniProtKB:Q80ZA5, ECO:0000269|PubMed:18165320, ECO:0000269|PubMed:20566632, ECO:0000269|PubMed:23056253, ECO:0000269|PubMed:26136660}., FUNCTION: [Isoform 2]: Sodium/bicarbonate cotransporter which mediates cotransport of sodium and bicarbonate in association with an efflux of intracellular chloride. {ECO:0000269|PubMed:10993873}.

Molecular Weight: 125.8 kDa
UniProt: Q5DTL9

Application Details

Application Notes: We expect the protein to work for functional studies. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.

Restrictions: For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
