	 Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalian cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC)
Grade:	custom-made

Target Details

Target:	PRR5
Alternative Name:	Prr5 (PRR5 Products)
Background:	Proline-rich protein 5 (Protein observed with Rictor-1) (Protor-1),FUNCTION: Subunit of
	mTORC2, which regulates cell growth and survival in response to hormonal signals. mTORC2 is
	activated by growth factors, but, in contrast to mTORC1, seems to be nutrient-insensitive.
	mTORC2 seems to function upstream of Rho GTPases to regulate the actin cytoskeleton,
	probably by activating one or more Rho-type guanine nucleotide exchange factors. mTORC2
	promotes the serum-induced formation of stress-fibers or F-actin. mTORC2 plays a critical role
	in AKT1 'Ser-473' phosphorylation, which may facilitate the phosphorylation of the activation
	loop of AKT1 on 'Thr-308' by PDK1 which is a prerequisite for full activation. mTORC2 regulates
	the phosphorylation of SGK1 at 'Ser-422'. mTORC2 also modulates the phosphorylation of
	PRKCA on 'Ser-657'. PRR5 plays an important role in regulation of PDGFRB expression and in
	modulation of platelet-derived growth factor signaling. May act as a tumor suppressor in breast
	cancer (By similarity). {ECO:0000250}.
