Characteristics:	Key Benefits:

- · Made to order protein from design to production by highly experienced protein experts.
- · Protein expressed in mammalien cells and purified in one-step affinity chromatography
- The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- · State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target Details

Target:	RAD9A
Alternative Name:	Rad9a (RAD9A Products)
Background:	Cell cycle checkpoint control protein RAD9A (mRAD9) (EC 3.1.11.2) (DNA repair exonuclease
	rad9 homolog A) (Rad9-like protein),FUNCTION: Component of the 9-1-1 cell-cycle checkpoint
	response complex that plays a major role in DNA repair. The 9-1-1 complex is recruited to DNA
	lesion upon damage by the RAD17-replication factor C (RFC) clamp loader complex. Acts then
	as a sliding clamp platform on DNA for several proteins involved in long-patch base excision
	repair (LP-BER). The 9-1-1 complex stimulates DNA polymerase beta (POLB) activity by
	increasing its affinity for the 3'-OH end of the primer-template and stabilizes POLB to those
	sites where LP-BER proceeds, endonuclease FEN1 cleavage activity on substrates with double,
	nick, or gap flaps of distinct sequences and lengths, and DNA ligase I (LIG1) on long-patch base
	excision repair substrates. The 9-1-1 complex is necessary for the recruitment of RHN01 to
	sites of double-stranded breaks (DSB) occurring during the S phase. RAD9A possesses 3'->5'
	double stranded DNA exonuclease activity. {ECO:0000250 UniProtKB:Q99638}.
