

## Datasheet for ABIN7575366 **CCL20 Protein (His tag)**

[Go to Product page](#)

### Overview

|                               |                                              |
|-------------------------------|----------------------------------------------|
| Quantity:                     | 100 µg                                       |
| Target:                       | CCL20                                        |
| Origin:                       | Human                                        |
| Source:                       | Escherichia coli (E. coli)                   |
| Protein Type:                 | Recombinant                                  |
| Purification tag / Conjugate: | This CCL20 protein is labelled with His tag. |
| Application:                  | SDS-PAGE (SDS), Western Blotting (WB), ELISA |

### Product Details

|           |                                            |
|-----------|--------------------------------------------|
| Purpose:  | Recombinant Human CCL20/MIP-3-alpha, N-His |
| Sequence: | Ser28-Met96                                |

### Target Details

|                   |                                                                                                                                                                                                                              |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | CCL20                                                                                                                                                                                                                        |
| Alternative Name: | CCL20/MIP-3-alpha ( <a href="#">CCL20 Products</a> )                                                                                                                                                                         |
| Background:       | Beta-chemokine exodus-1, SCYA20, LARC, C-C motif chemokine 20, Liver and activation-regulated chemokine, Small-inducible cytokine A20, MIP-3-alpha, CCL20, MIP3A, Macrophage inflammatory protein 3 alpha, CC chemokine LARC |
| Molecular Weight: | 10.25 kDa                                                                                                                                                                                                                    |
| UniProt:          | <a href="#">P78556</a>                                                                                                                                                                                                       |

## Target Details

---

Pathways: [The Global Phosphorylation Landscape of SARS-CoV-2 Infection](#)

## Application Details

---

Application Notes: Optimal working dilution should be determined by the investigator.

---

Restrictions: For Research Use only

## Handling

---

Format: Lyophilized

---

Reconstitution: Reconstitute in sterile water for a stock solution.

---

Buffer: Lyophilized from a solution in PBS pH 7.4, 0.02 % NLS, 1 mM EDTA, 4 % Trehalose, 1 % Mannitol.

---

Storage: 4 °C, -20 °C, -80 °C

---

Storage Comment: Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 2 to 8 °C for one week .Store at -20 to -80 °C for twelve months from the date of receipt.
