

## Datasheet for ABIN7575372 **CCL26 Protein (GST tag)**

[Go to Product page](#)

### Overview

|                               |                                              |
|-------------------------------|----------------------------------------------|
| Quantity:                     | 100 µg                                       |
| Target:                       | CCL26                                        |
| Origin:                       | Human                                        |
| Source:                       | Escherichia coli (E. coli)                   |
| Protein Type:                 | Recombinant                                  |
| Purification tag / Conjugate: | This CCL26 protein is labelled with GST tag. |
| Application:                  | SDS-PAGE (SDS), Western Blotting (WB), ELISA |

### Product Details

|           |                                                |
|-----------|------------------------------------------------|
| Purpose:  | Recombinant Human CCL26/Eotaxin-3/TSC-1, N-GST |
| Sequence: | Ser27-Leu94                                    |

### Target Details

|                   |                                                                                                                                                                                           |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | CCL26                                                                                                                                                                                     |
| Alternative Name: | CCL26/Eotaxin-3/TSC-1 ( <a href="#">CCL26 Products</a> )                                                                                                                                  |
| Background:       | CC chemokine IMAC, C-C motif chemokine 26, CCL26, Small-inducible cytokine A26, Macrophage inflammatory protein 4-alpha, Thymic stroma chemokine-1, TSC-1, MIP-4-alpha, Eotaxin-3, SCYA26 |
| Molecular Weight: | 34.91 kDa                                                                                                                                                                                 |
| UniProt:          | <a href="#">Q9Y258</a>                                                                                                                                                                    |

## Target Details

Pathways: [Regulation of Actin Filament Polymerization](#)

## Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

## Handling

Format: Lyophilized

Reconstitution: Reconstitute in sterile water for a stock solution.

Buffer: Lyophilized from a solution in PBS pH 7.4, 0.02 % NLS, 1 mM EDTA, 4 % Trehalose, 1 % Mannitol.

Storage: 4 °C,-20 °C,-80 °C

Storage Comment: Use a manual defrost freezer and avoid repeated freeze thaw cycles.Store at 2 to 8 °C for one week .Store at -20 to -80 °C for twelve months from the date of receipt.
