

## Datasheet for ABIN7575701 **TNFRSF12A Protein (GST tag)**

[Go to Product page](#)

### Overview

|                               |                                                  |
|-------------------------------|--------------------------------------------------|
| Quantity:                     | 100 µg                                           |
| Target:                       | TNFRSF12A                                        |
| Origin:                       | Human                                            |
| Source:                       | Escherichia coli (E. coli)                       |
| Protein Type:                 | Recombinant                                      |
| Purification tag / Conjugate: | This TNFRSF12A protein is labelled with GST tag. |
| Application:                  | Western Blotting (WB), SDS-PAGE (SDS), ELISA     |

### Product Details

|           |                                          |
|-----------|------------------------------------------|
| Purpose:  | Recombinant Human CD266/TNFRSF12A, N-GST |
| Sequence: | Ser24-Ala126                             |

### Target Details

|                   |                                                                                                                                                                                                 |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | TNFRSF12A                                                                                                                                                                                       |
| Alternative Name: | CD266/TNFRSF12A ( <a href="#">TNFRSF12A Products</a> )                                                                                                                                          |
| Background:       | FGF-inducible 14, TNFRSF12A, FN14, CD266, TweakR, Fibroblast growth factor-inducible immediate-early response protein 14, Tweak-receptor, Tumor necrosis factor receptor superfamily member 12A |
| Molecular Weight: | 37.72 kDa                                                                                                                                                                                       |
| UniProt:          | <a href="#">Q9NP84</a>                                                                                                                                                                          |

## Target Details

Pathways: [Apoptosis](#), [Regulation of Cell Size](#)

## Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

## Handling

Format: Lyophilized

Reconstitution: Reconstitute in sterile water for a stock solution.

Buffer: Lyophilized from a solution in PBS pH 7.4, 0.02 % NLS, 1 mM EDTA, 4 % Trehalose, 1 % Mannitol.

Storage: 4 °C,-20 °C,-80 °C

Storage Comment: Use a manual defrost freezer and avoid repeated freeze thaw cycles.Store at 2 to 8 °C for one week .Store at -20 to -80 °C for twelve months from the date of receipt.
