

## Datasheet for ABIN7577337 **GZMA Protein (His tag)**

[Go to Product page](#)

### Overview

|                               |                                              |
|-------------------------------|----------------------------------------------|
| Quantity:                     | 100 µg                                       |
| Target:                       | GZMA                                         |
| Origin:                       | Human                                        |
| Source:                       | Escherichia coli (E. coli)                   |
| Protein Type:                 | Recombinant                                  |
| Purification tag / Conjugate: | This GZMA protein is labelled with His tag.  |
| Application:                  | Western Blotting (WB), SDS-PAGE (SDS), ELISA |

### Product Details

|           |                               |
|-----------|-------------------------------|
| Purpose:  | Recombinant Human GZMA, N-His |
| Sequence: | Ile29-Val262                  |

### Target Details

|                   |                                                                                                                                           |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | GZMA                                                                                                                                      |
| Alternative Name: | GZMA ( <a href="#">GZMA Products</a> )                                                                                                    |
| Background:       | H factor, CTLA3, Cytotoxic T-lymphocyte proteinase 1, CTL tryptase, Fragmentin-1, HFSP, HF, Granzyme A, Granzyme-1, GZMA, Hanukkah factor |
| Molecular Weight: | 28.16 kDa                                                                                                                                 |
| UniProt:          | <a href="#">P12544</a>                                                                                                                    |
| Pathways:         | <a href="#">Apoptosis</a>                                                                                                                 |

Application Details

|                    |                                                                    |
|--------------------|--------------------------------------------------------------------|
| Application Notes: | Optimal working dilution should be determined by the investigator. |
| Restrictions:      | For Research Use only                                              |

Handling

|                  |                                                                                                                                                                        |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Format:          | Lyophilized                                                                                                                                                            |
| Reconstitution:  | Reconstitute in sterile water for a stock solution.                                                                                                                    |
| Buffer:          | Lyophilized from a solution in PBS pH 7.4, 0.02 % NLS, 1 mM EDTA, 4 % Trehalose, 1 % Mannitol.                                                                         |
| Storage:         | 4 °C,-20 °C,-80 °C                                                                                                                                                     |
| Storage Comment: | Use a manual defrost freezer and avoid repeated freeze thaw cycles.Store at 2 to 8 °C for one week .Store at -20 to -80 °C for twelve months from the date of receipt. |
