

## Datasheet for ABIN7578451 NFYC Protein (GST tag)

[Go to Product page](#)

### Overview

|                               |                                              |
|-------------------------------|----------------------------------------------|
| Quantity:                     | 100 µg                                       |
| Target:                       | NFYC                                         |
| Origin:                       | Human                                        |
| Source:                       | Escherichia coli (E. coli)                   |
| Protein Type:                 | Recombinant                                  |
| Purification tag / Conjugate: | This NFYC protein is labelled with GST tag.  |
| Application:                  | Western Blotting (WB), SDS-PAGE (SDS), ELISA |

### Product Details

|           |                               |
|-----------|-------------------------------|
| Purpose:  | Recombinant Human NFYC, N-GST |
| Sequence: | Met1-Val263                   |

### Target Details

|                   |                                                                                                                                                                     |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | NFYC                                                                                                                                                                |
| Alternative Name: | NFYC ( <a href="#">NFYC Products</a> )                                                                                                                              |
| Background:       | CAAT box DNA-binding protein subunit C, NFYC, Transactivator HSM-1/2, Nuclear transcription factor Y subunit gamma, NF-YC, Nuclear transcription factor Y subunit C |
| Molecular Weight: | 56.19 kDa                                                                                                                                                           |
| UniProt:          | <a href="#">Q13952</a>                                                                                                                                              |
| Pathways:         | <a href="#">Regulation of Lipid Metabolism by PPARalpha</a>                                                                                                         |

## Application Details

---

Application Notes: Optimal working dilution should be determined by the investigator.

---

Restrictions: For Research Use only

---

## Handling

---

Format: Lyophilized

---

Reconstitution: Reconstitute in sterile water for a stock solution.

---

Buffer: Lyophilized from a solution in PBS pH 7.4, 0.02 % NLS, 1 mM EDTA, 4 % Trehalose, 1 % Mannitol.

---

Storage: 4 °C,-20 °C,-80 °C

---

Storage Comment: Use a manual defrost freezer and avoid repeated freeze thaw cycles.Store at 2 to 8 °C for one week .Store at -20 to -80 °C for twelve months from the date of receipt.
