**Resistin Protein (RETN) (His tag)**[Go to Product page](#)

## Overview

|                               |                                                 |
|-------------------------------|-------------------------------------------------|
| Quantity:                     | 100 µg                                          |
| Target:                       | Resistin (RETN)                                 |
| Origin:                       | Human                                           |
| Source:                       | Escherichia coli (E. coli)                      |
| Protein Type:                 | Recombinant                                     |
| Purification tag / Conjugate: | This Resistin protein is labelled with His tag. |
| Application:                  | SDS-PAGE (SDS), Western Blotting (WB), ELISA    |

## Product Details

|           |                               |
|-----------|-------------------------------|
| Purpose:  | Recombinant Human RETN, N-His |
| Sequence: | Ser17-Pro108                  |

## Target Details

|                   |                                                                                                                                                                                                                                                    |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | Resistin (RETN)                                                                                                                                                                                                                                    |
| Alternative Name: | RETN ( <a href="#">RETN Products</a> )                                                                                                                                                                                                             |
| Background:       | Cysteine-rich secreted protein A12-alpha-like 2, Adipose tissue-specific secretory factor, FIZZ3, HXCP1, RETN, C/EBP-epsilon-regulated myeloid-specific secreted cysteine-rich protein, Cysteine-rich secreted protein FIZZ3, RSTN, ADSF, Resistin |
| Molecular Weight: | 12.04 kDa                                                                                                                                                                                                                                          |
| UniProt:          | <a href="#">Q9HD89</a>                                                                                                                                                                                                                             |

## Target Details

Pathways: [Feeding Behaviour, Smooth Muscle Cell Migration](#)

## Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

## Handling

Format: Lyophilized

Reconstitution: Reconstitute in sterile water for a stock solution.

Buffer: Lyophilized from a solution in PBS pH 7.4, 0.02 % NLS, 1 mM EDTA, 4 % Trehalose, 1 % Mannitol.

Storage: 4 °C,-20 °C,-80 °C

Storage Comment: Use a manual defrost freezer and avoid repeated freeze thaw cycles.Store at 2 to 8 °C for one week .Store at -20 to -80 °C for twelve months from the date of receipt.
