## Overview

|                               |                                               |
|-------------------------------|-----------------------------------------------|
| Quantity:                     | 100 µg                                        |
| Target:                       | RUVBL1                                        |
| Origin:                       | Human                                         |
| Source:                       | Escherichia coli (E. coli)                    |
| Protein Type:                 | Recombinant                                   |
| Purification tag / Conjugate: | This RUVBL1 protein is labelled with His tag. |
| Application:                  | ELISA, Western Blotting (WB), SDS-PAGE (SDS)  |

## Product Details

|           |                                 |
|-----------|---------------------------------|
| Purpose:  | Recombinant Human RUVBL1, N-His |
| Sequence: | Met1-Lys456                     |

## Target Details

|                   |                                                                                                                                                                                                                                                                                                                        |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | RUVBL1                                                                                                                                                                                                                                                                                                                 |
| Alternative Name: | RUVBL1 ( <a href="#">RUVBL1 Products</a> )                                                                                                                                                                                                                                                                             |
| Background:       | 49 kDa TBP-interacting protein, Nuclear matrix protein 238, NMP 238, TAP54-alpha, RuvB-like 1, INO80H, 54 kDa erythrocyte cytosolic protein, TIP60-associated protein 54-alpha, 49 kDa TATA box-binding protein-interacting protein, RUVBL1, Pontin 52, TIP49, INO80 complex subunit H, ECP-54, TIP49A, NMP238, TIP49a |
| Molecular Weight: | 52.54 kDa                                                                                                                                                                                                                                                                                                              |
| UniProt:          | <a href="#">Q9Y265</a>                                                                                                                                                                                                                                                                                                 |

## Target Details

---

Pathways: [Telomere Maintenance](#)

## Application Details

---

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

## Handling

---

Format: Lyophilized

Reconstitution: Reconstitute in sterile water for a stock solution.

Buffer: Lyophilized from a solution in PBS pH 7.4, 0.02 % NLS, 1 mM EDTA, 4 % Trehalose, 1 % Mannitol.

Storage: 4 °C,-20 °C,-80 °C

Storage Comment: Use a manual defrost freezer and avoid repeated freeze thaw cycles.Store at 2 to 8 °C for one week .Store at -20 to -80 °C for twelve months from the date of receipt.
