## Overview

|                               |                                              |
|-------------------------------|----------------------------------------------|
| Quantity:                     | 100 µg                                       |
| Target:                       | GIT2                                         |
| Origin:                       | Mouse                                        |
| Source:                       | Escherichia coli (E. coli)                   |
| Protein Type:                 | Recombinant                                  |
| Purification tag / Conjugate: | This GIT2 protein is labelled with His tag.  |
| Application:                  | ELISA, Western Blotting (WB), SDS-PAGE (SDS) |

## Product Details

|           |                                       |
|-----------|---------------------------------------|
| Purpose:  | Recombinant Mouse GIT2 Protein, N-His |
| Sequence: | Phe29-Gly358                          |

## Target Details

|                   |                                                                                                                                                                                                              |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | GIT2                                                                                                                                                                                                         |
| Alternative Name: | GIT2 ( <a href="#">GIT2 Products</a> )                                                                                                                                                                       |
| Background:       | KIAA0148, Cool-interacting tyrosine-phosphorylated protein 2, CAT-2, GRK-interacting protein 2, GIT2, G protein-coupled receptor kinase-interactor 2, ARF GTPase-activating protein GIT2, ARF GAP GIT2, CAT2 |
| Molecular Weight: | 39.46 kDa                                                                                                                                                                                                    |
| UniProt:          | <a href="#">Q9JLQ2</a>                                                                                                                                                                                       |

## Target Details

Pathways: [Regulation of G-Protein Coupled Receptor Protein Signaling](#)

## Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

## Handling

Format: Lyophilized

Reconstitution: Reconstitute in sterile water for a stock solution.

Buffer: Lyophilized from a solution in PBS pH 7.4, 0.02 % NLS, 1 mM EDTA, 4 % Trehalose, 1 % Mannitol.

Storage: 4 °C,-20 °C

Storage Comment: Use a manual defrost freezer and avoid repeated freeze thaw cycles.Store at 2 to 8 °C for one week .Store at -20 °C for twelve months from the date of receipt.
