

Datasheet for ABIN7584078 **DARS Protein (AA 1-501) (His tag)**

Go to Product page

_					
	W	0	rv	10	W

Quantity:	100 μg
Target:	DARS
Protein Characteristics:	AA 1-501
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This DARS protein is labelled with His tag.
Application:	ELISA

Purification tag / Conjugate:	njugate: This DARS protein is labelled with His tag.	
Application:	ELISA	
Product Details		
Sequence:	MPSANASRKG QEKPREIVDA AEDYAKERYG VSSMIQSQEK PDRVLVRVKD LTVQKADEVV

	RGEEILSGAQ RIHDPQLLTE RALHHGIDLE KIKAYIDSFR FGAPPHAGGG IGLERVTMLF	
	LGLHNVRQTS MFPRDPKRLT P	
Specificity:	Rattus norvegicus (Rat)	
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mamma cells or by baculovirus infection. Be aware about differences in price and lead time.	

Product Details Purity: > 90 % **Target Details DARS** Target: Alternative Name Aspartate--tRNA ligase, cytoplasmic (Dars) (DARS Products) Background: Recommended name: Aspartate--tRNA ligase, cytoplasmic. EC= 6.1.1.12. Alternative name(s): Aspartyl-tRNA synthetase. Short name= AspRS UniProt: P15178 **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	

Storage Comment:

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
