	W	0	rv	10	W

Quantity:	100 μg	
Target:	GATA4	
Protein Characteristics:	AA 1-440	
Origin:	Rat	
Source:	Yeast	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This GATA4 protein is labelled with His tag.	
Application:	ELISA	

unification tag / Conjugate. This GATA4 protein is labelled with his tag.		
Application:	ELISA

Specificity:	Rattus norvegicus (Rat)	
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalier	
	cells or by baculovirus infection. Be aware about differences in price and lead time.	

Product Details > 90 % Purity: **Target Details** Target: GATA4 Alternative Name Transcription factor GATA-4 (Gata4) (GATA4 Products) Background: Recommended name: Transcription factor GATA-4. Alternative name(s): DNA-binding protein GATA-GT2 GATA-binding factor 4 UniProt: P46152 Pathways: Peptide Hormone Metabolism, Carbohydrate Homeostasis **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Lyophilized Format: Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
