

## Datasheet for ABIN7585464 **PDIA3 Protein (AA 25-505) (His tag)**

## Overview

| Quantity:                     | 100 μg                                       |
|-------------------------------|--|
| Target:                       | PDIA3  |
| Protein Characteristics:      | AA 25-505                                    |
| Origin:                       | Rat  |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant                                  |
| Purification tag / Conjugate: | This PDIA3 protein is labelled with His tag. |
| Application:                  | ELISA  |

| Application:     | ELISA  |
|------------------|--|

| Specificity:     | Rattus norvegicus (Rat)  |
| Characteristics: | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien |
|                  | cells or by baculovirus infection. Be aware about differences in price and lead time.            |
|                  |  |

## **Product Details** > 90 % Purity: **Target Details** Target: PDIA3 Alternative Name Protein disulfide-isomerase A3 (Pdia3) (PDIA3 Products) Background: Recommended name: Protein disulfide-isomerase A3. EC= 5.3.4.1. Alternative name(s): 58 kDa glucose-regulated protein 58 kDa microsomal protein. Short name= p58 Disulfide isomerase ER-60 Endoplasmic reticulum resident protein 57. Short name= ER protein 57. Short name= ERp57 Endoplasmic reticulum resident protein 60. Short name= ER protein 60. Short name= ERp60 HIP-70 Q-2 UniProt: P11598 Pathways: Maintenance of Protein Location, Protein targeting to Nucleus, Cell RedoxHomeostasis **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized

0.2-2 mg/mL

Concentration:

## Handling

| Buffer:          | Tris-based buffer, 50 % glycerol  |
|------------------|---|
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:         | -20 °C  |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                                |
