

Datasheet for ABIN7585570
PNCK Protein (AA 1-343) (His tag)

[Go to Product page](#)

Overview

Quantity:	100 µg
Target:	PNCK
Protein Characteristics:	AA 1-343
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PNCK protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MLLKKQTED ISSVYEIREK LGSGAFSEVM LAQERGAHL VALKCIKKK LRGKEALVEN EIAVLRRISH PNIVALEDVH ESPSHLYLAM ELVTGGELFD RIMERGSYTE KDASHLVGQV LGAVSYLHSL GIVHRDLKPE NLLYATPFED SKIMVSDFGL SKIQAGNMLG TACGTPGYVA PELLEQKPYG KAVDVWALGV ISYILLCGYP PFYDESDPEL FSQILRASYE FDSPFWDDIS ESAKDFIRHL LERDPQKRFT CQQALQHLWI SGDAALDRDI LGSVSEQIQK NFARTHWKRA FNATSFRLRHI RKLQGSPEGE EASRQGMTRH SHPGLGTSQS PKW
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	PNCK
Alternative Name:	Calcium/calmodulin-dependent protein kinase type 1B (Pnck) (PNCK Products)
Background:	<p>Recommended name: Calcium/calmodulin-dependent protein kinase type 1B.</p> <p>EC= 2.7.11.17.</p> <p>Alternative name(s): CaM kinase I beta.</p> <p>Short name= CaM kinase IB.</p> <p>Short name= CaM-KI beta.</p> <p>Short name= CaMKI-beta Pregnancy up-regulated non-ubiquitously-expressed CaM kinase homolog</p>
UniProt:	O70150

Application Details

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
