

Datasheet for ABIN7585737
PSMB9 Protein (AA 21-219) (His tag)

[Go to Product page](#)

Overview

Quantity:	100 µg
Target:	PSMB9
Protein Characteristics:	AA 21-219
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PSMB9 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	TTIMAVEFDG GVVVGSDSRV SAGAAVNRV FDKLSPLHQR IYCALSGSAA DAQAIADMAA YQLELHGLEL EEPPLVLAAA NIVKNISYKY REDLLAHLMV AGWDQHEGGQ VYGTMGGM LI RQPFAIGGSG STYIYGYVDA AYKPGMTPEE CRRFTTDAIT LAMNRDGSSG GVIYLV TITA DGV DHRVILG DELPKFYDE
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	PSMB9
---------	-------

Target Details

Alternative Name:	Proteasome subunit beta type-9 (Psmb9) (PSMB9 Products)
Background:	<p>Recommended name: Proteasome subunit beta type-9.</p> <p>EC= 3.4.25.1.</p> <p>Alternative name(s): Low molecular mass protein 2 Macropain chain 7 Multicatalytic endopeptidase complex chain 7 Proteasome chain 7 Proteasome subunit beta-1i Really interesting new gene 12 protein</p>
UniProt:	P28077
Pathways:	Mitotic G1-G1/S Phases , DNA Replication , Synthesis of DNA

Application Details

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
