**SUMO1 Protein (AA 1-100) (His tag)**[Go to Product page](#)

## Overview

Quantity:	100 µg
Target:	SUMO1
Protein Characteristics:	AA 1-100
Origin:	Arabidopsis thaliana
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SUMO1 protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	MSANQEEDKK PGDGGAHINL KVKGDGNEV FFRIKRSTQL KKL MNAYCDR QSVDMNSIAF LFDGRRLRAE QTPDELDMED GDEIDAMLHQ TGGSGGGATA
Specificity:	Arabidopsis thaliana (Mouse-ear cress)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	SUMO1
Alternative Name:	Small ubiquitin-related modifier 1 (SUMO1) ( <a href="#">SUMO1 Products</a> )

## Target Details

Background:	Recommended name: Small ubiquitin-related modifier 1. Short name= AtSUMO1. Alternative name(s): Ubiquitin-like protein SMT3
UniProt:	<a href="#">P55852</a>
Pathways:	<a href="#">M Phase, Positive Regulation of Endopeptidase Activity, Protein targeting to Nucleus, Ubiquitin Proteasome Pathway</a>

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
