

## Datasheet for ABIN7586432 **TUBb6 Protein (AA 1-449) (His tag)**

## Overview

| Quantity:                     | 100 μg                                       |
|-------------------------------|--|
| Target:                       | TUBb6  |
| Protein Characteristics:      | AA 1-449                                     |
| Origin:                       | Arabidopsis thaliana                         |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant                                  |
| Purification tag / Conjugate: | This TUBb6 protein is labelled with His tag. |
| Application:                  | ELISA  |

| Specificity:     | Arabidopsis thaliana (Mouse-ear cress)   |
| Characteristics: | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien |
|                  | cells or by baculovirus infection. Be aware about differences in price and lead time.            |
|                  |  |

## **Product Details** > 90 % Purity: **Target Details** TUBb6 Target: Alternative Name Tubulin beta-6 chain (TUBB6) (TUBb6 Products) Background: Recommended name: Tubulin beta-6 chain. Alternative name(s): Beta-6-tubulin UniProt: P29514 Pathways: Microtubule Dynamics **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol

Handling Advice:

Storage Comment:

Storage:

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to
