UBE2V2 Protein (AA 1-137) (His tag)

[Go to Product page](#)

Overview

Quantity:	100 µg
Target:	UBE2V2
Protein Characteristics:	AA 1-137
Origin:	Saccharomyces cerevisiae
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This UBE2V2 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MSKVPRNFRL LEELEKGEKG FGPESCSYGL ADSDDITMTK WNGTILGPPH SNHENRIYSL SIDCGPNYPD SPPKVTFISK INLPCVNPTT GEVQTDFTL RDWKRAYTME TLLDLRKEM ATPANKKLRQ PKEGETF
Specificity:	Saccharomyces cerevisiae (strain ATCC 204508 / S288c) (Bakers yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	UBE2V2
Alternative Name:	Ubiquitin-conjugating enzyme variant MMS2 (MMS2) (UBE2V2 Products)

Target Details

Background:	Recommended name: Ubiquitin-conjugating enzyme variant MMS2. Short name= UEV MMS2
-------------	--

UniProt:	P53152
----------	------------------------

Pathways:	Positive Regulation of Response to DNA Damage Stimulus
-----------	--

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
----------	--

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Lyophilized
---------	-------------

Concentration:	0.2-2 mg/mL
----------------	-------------

Buffer:	Tris-based buffer, 50 % glycerol
---------	----------------------------------

Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
------------------	---

Storage:	-20 °C
----------	--------

Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
------------------	--
