

Datasheet for ABIN7587742 RTN4IP1 Protein (AA 41-396) (His tag)

Overview

Specificity:

Purity:

Characteristics:

Overview	
Quantity:	100 μg
Target:	RTN4IP1
Protein Characteristics:	AA 41-396
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This RTN4IP1 protein is labelled with His tag.
Application:	ELISA

Target Details

Target:	RTN4IP1
Alternative Name:	Reticulon-4-interacting protein 1, mitochondrial (RTN4IP1) (RTN4IP1 Products)
Background:	Recommended name: Reticulon-4-interacting protein 1, mitochondrial
UniProt:	Q0VC50

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
