Quantity:	100 μg	
Target:	MRPS5	
Protein Characteristics:	AA 1-430	
Origin:	Cow	
Source:	Yeast	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This MRPS5 protein is labelled with His tag.	
Application:	ELISA	

Purification tag / Conjugate:	This MRPS5 protein is labelled with His tag.

Specificity:	Bos taurus (Bovine)	
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien	
	cells or by baculovirus infection. Be aware about differences in price and lead time.	

Product Details > 90 % Purity: **Target Details** Target: MRPS5 28S ribosomal protein S5, mitochondrial (MRPS5) (MRPS5 Products) Alternative Name Background: Recommended name: 28S ribosomal protein S5, mitochondrial. Short name= MRP-S5. Short name= S5mt UniProt: Q2KID9 Pathways: SARS-CoV-2 Protein Interactome **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized Concentration: 0.2-2 mg/mL

Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to

Tris-based buffer, 50 % glycerol

one week
