CUEDC2 Protein (AA 1-283) (His tag)[Go to Product page](#)

Overview

Quantity:	100 µg
Target:	CUEDC2
Protein Characteristics:	AA 1-283
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CUEDC2 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MELERIVSAA LLAFVQTHLP EADLSGLDDV IFSYVLGVLG DLGPSGPSEE NFDMEAFTM MEAYVPGFAH IPRGTIGDMI QKLSGQLSGA RNKENVQPQS SEVQGQVSIS PEPLQRPEKL KEETMSSAGD TQDEAAGPEE ELLPGVDVLL EVFPTCSVEQ AQWVLAKARG DLEEAVQMLV EGKQGPPAWD GPNQDLPRRL RGPQKDELKS FILQKYMMVD SAEDQKIHRP MAPKEAPKKL IRYIDNQIVS TKGERFKDVR NPEAEEMKAT YINLKPARKY RFH
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	CUEDC2
Alternative Name:	CUE domain-containing protein 2 (CUEDC2) (CUEDC2 Products)
Background:	Recommended name: CUE domain-containing protein 2
UniProt:	Q3ZBN4

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
