Target Details

9		
Background:	Synonyms: ADAM TS related protein 1, ADAMTS like 1, ADAMTSR 1, C9orf94, Chromosome 9	
	open reading frame 94, Punctin 1, Punctin, Thrombospondin, ATL1_HUMAN.	
	Background: This gene encodes a secreted protein and member of the ADAMTS (a disintegrin	
	and metalloproteinase with thrombospondin motif) family. This protein lacks the	
	metalloproteinase and disintegrin-like domains, which are typical of the ADAMTS family, but	
	contains other ADAMTS domains, including the thrombospondin type 1 motif. This protein may	
	have important functions in the extracellular matrix. Alternative splicing results in multiple	
	transcript variants encoding distinct proteins.	
Gene ID:	92949
