Target Details

Target:	ADAMTSL1
Alternative Name:	ADAMTSL1 (ADAMTSL1 Products)
Background:	Synonyms: ADAM TS related protein 1, ADAMTS like 1, ADAMTSR 1, C9orf94, Chromosome 9

Target Details

open reading frame 94, Punctin 1, Punctin, Thrombospondin, ATL1_HUMAN.

Background: This gene encodes a secreted protein and member of the ADAMTS (a disintegrin and metalloproteinase with thrombospondin motif) family. This protein lacks the metalloproteinase and disintegrin-like domains, which are typical of the ADAMTS family, but contains other ADAMTS domains, including the thrombospondin type 1 motif. This protein may have important functions in the extracellular matrix. Alternative splicing results in multiple transcript variants encoding distinct proteins.
