Target Details

open reading frame 94, Punctin 1, Punctin, Thrombospondin, ATL1_HUMAN.
Background: This gene encodes a secreted protein and member of the ADAMTS (a disintegrin
and metalloproteinase with thrombospondin motif) family. This protein lacks the
metalloproteinase and disintegrin-like domains, which are typical of the ADAMTS family, but
contains other ADAMTS domains, including the thrombospondin type 1 motif. This protein may
have important functions in the extracellular matrix. Alternative splicing results in multiple
transcript variants encoding distinct proteins.

Gene ID:

92949
