

Datasheet for ABIN7590112

CCDC116 Protein (AA 1-540) (His tag)

Overview

Quantity:	100 μg
Target:	CCDC116
Protein Characteristics:	AA 1-540
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CCDC116 protein is labelled with His tag.
Application:	ELISA

Purification tag / Conjugate:	This CCDCT to protein is labelled with his tag.
Application:	ELISA
Product Details	
Sequence:	MARCRHHSGY LADDEAAHGT YVARLPKKHL LPEMRPTCKL GRVPHLPSMN RYSERQGHQQ

	LATPCHLHSH FPFPVFSPFL PLGKSFSTSP PTLCPEVSSR AGLEVLEGHL KGRGCFTHHF
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.

Product Details > 90 % Purity: **Target Details** CCDC116 Target: Coiled-coil domain-containing protein 116 (Ccdc116) (CCDC116 Products) Alternative Name Recommended name: Coiled-coil domain-containing protein 116 Background: UniProt: 04V8B5 **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

one week

-20 °C
