ADAMTSL4 (ADAMTSL4 Products)

Target Details

repeat containing 1, thrombospondin repeat protein 1, TSRC1, ATL4_HUMAN. Background: ADAMTSL4 is a member of ADAMTS (a disintegrin and metalloproteinase with thrombospondin motifs)-like family and has seven thrombospondin type 1 repeats. The thrombospondin type 1 repeat domain is found in many proteins with diverse biological functions including cellular adhesion, angiogenesis, and patterning of the developing nervous system. Alternate transcriptional splice variants, encoding different isoforms, have been characterized.ADAMTSL4 is involved in the positive regulation of apoptosis. Gene ID: 54507 UniProt: Q6UY14 Application Details WB 1:300-5000
