CHIA Protein (AA 22-473) (His tag)

[Go to Product page](#)

Overview

Quantity:	100 µg
Target:	CHIA
Protein Characteristics:	AA 22-473
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CHIA protein is labelled with His tag.
Application:	ELISA

Purity: > 90 %

Target Details

Target: CHIA

Alternative Name: Acidic mammalian chitinase (Chia) ([CHIA Products](#))

Background: Recommended name: Acidic mammalian chitinase.
Short name= AMCase.
EC= 3.2.1.14

UniProt: [Q6RY07](#)

Application Details

Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions: For Research Use only

Handling

Format: Lyophilized

Concentration: 0.2-2 mg/mL

Buffer: Tris-based buffer, 50 % glycerol

Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

Storage: -20 °C

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
